📍 Jakarta

EXPERIENCE

Lead Infrastructure Security

Privy Identitas Digital

📅 08/2024 📍 Jakarta, Indonesia

- Develop and implement a comprehensive security strategy for all IT infrastructure, including on-premises, hybrid, and cloud environments.
- Lead and mentor the infrastructure security team, working closely with IT, DevOps, cloud engineers, and network architects to ensure security is embedded across all systems and services.
- Oversee the configuration and management of firewalls, VPNs, IDS/IPS systems, and network segmentation to ensure secure data flows across the organization.

Security Engineer

Privy Identitas Digital

📅 02/2022 - 08/2024 📍 Jakarta, Indonesia

- Ensure that the monitoring tools used can function normally/run as they should
- Assist in reporting incidents to the PIC concerned
- Ensure that all monitored data cannot be read or retrieved by unauthorized parties
- Check and update any updates to the operating system and monitored applications
- Perform backups of all data, logs, reports to be safe and if the system has a problem, be able to restore existing system backup data
- Responsible for maintaining system security through various tools such as scanning with antivirus and so on as well as making settings on the browser
- Perform checks and repairs if at any time there is a problem with the system

System Engineer

Indodana

📅 10/2020 - 02/2022 📍 Jakarta, Indonesia

- Designing, implementing, and maintaining IT infrastructure and systems.
- Configuring and troubleshooting servers, networks, and storage solutions.
- Managing virtualization platforms and cloud environments.
- Monitoring system performance and ensuring high availability and reliability.

Network Engineer

PT. Maxindo Mitra Solusi

📅 10/2018 - 10/2020 📍 Jakarta, Indonesia

- Installing and configuring computer hardware, software, systems, networks, printers, and scanners
- Monitoring and maintaining computer systems and networks
- Responding in a timely manner to service issues and requests
- Providing technical support across the company (this may be in person or over the phone)
- Setting up accounts for new users
- Repairing and replacing equipment as necessary
- Testing new technology
- Possibly training junior staff

SUMMARY

I am an experienced system engineer seeking a full-time position in the field of system infrastructure, where I can apply my knowledge and skills for continuous improvement.

EDUCATION

Bachelor of Engineering - BE

Universitas Mercu Buana
